INTRODUCTION

The Williamson Road Builders cut a road through the wilderness of northern Pennsylvania two hundred and two years ago, 1792-1797. They opened the land from Lycoming Creek near Williamsport to Painted Post, N.Y. The movement over that road, today's US 15, opened Tioga County to development. On March 26, 1994 Tioga County celebrated its one hundred and ninetieth anniversary.

The Pennsylvania Historical Commission, which has the responsibility of marking historical places within the Commonwealth has placed markers in Tioga County. Noting its coal discovery, railroads, Williamson Road, electrification, and other historical facts. The Wellsboro Chapter of the National Society of Daughters of the American Revolution in keeping with its mission to mark historical spots, buildings, trails, etc., has also placed a number of markers throughout the County. Historical markers are also placed by municipalities, veterans and citizen groups.

During the Bicentennial of the United States, 1976, all municipalities were encouraged to mark the event with markers. This was done in several of the towns.

It is hoped that this Guide to Historical Markers of Tioga County will make you aware of the heritage of Tioga County and help you locate the markers. You can help preserve the markers by reporting any damage or removal of them to local officials. There are several missing. The DAR marker at Tioga near the site of the Old Tavern which marked the place where Tioga County was born and one placed in Lawrenceville marked the site of the first settler were not found. There may be others on private land or hidden from view. We hope that you let someone know if these are found.
